

**Transmission Replacement Processes Senior Task Force (TRPSTF)**  
**PJM Interconnection**  
**Members Committee Webinar**  
**March 20, 2017**

On February 24, 2017, the Transmission Replacement Processes Senior Task Force began the meeting with a brief overview of the TRPSTF status update and guidance discussion from the MRC held on February 23, 2017. The overview communicated stakeholder agreement to extend the task force's hiatus for three months, pending action by the Federal Energy Regulatory Commission, which currently lacks a quorum and requested a March presentation to the MRC of progress-to-date by the senior task force.

The TRPSTF also conducted a final review of the TCIC Requirements Specification accompanied by an overview of the revised Transmission Cost Information Center (TCIC) prototype which had been modified and improved since the last TRPSTF meeting on January 30<sup>th</sup>, 2017. Stakeholders provided PJM with several additional requests for the prototype that would provide more clarity around the data contained within the TCIC. The overall group consensus was encouraging and PJM will work internally towards implementation so that the tool can be utilized and tested by the TRPSTF stakeholders.

Please visit the TRPSTF site for further information, and direct any questions you may have to the TRPSTF secretaries ([Julia Spatafore](#) and [Jason Quevada](#)).
