

DR Load management open registration window

Pete Langbein
Manager, Demand Response Operations
Market Implementation Committee
May 3, 2017

- DR registrations must be finalized before DY starts:
 - New customers can not enter the market during the DY
 - Customers that can no longer reduce load (e.g.: bankruptcy, move) will need other customers in portfolio to make up load reductions

Catalyst: CP annual requirement would require new customers to reduce load (eliminates potential issue of late registered customers with no performance requirement)

- **Solution A**
 - Registration deadline moved back from 5/31 to 12/1.
 - Registration that can no longer reduce load must be terminated
 - Duplicate resolution – existing registration maintained, new registration not permitted
 - Daily deficiency penalty may change on daily basis (late registrations, terminated registrations)
 - Test – registration should still be tested together. Terminated registrations already tested will have test eliminated
 - Test commitment changed from daily average during summer period to daily average for DY
 - Replacement capacity – not required to purchase for balance of Delivery Year
- **Solution B (same as A except)**
 - No registration deadline – can have new registration on last day of delivery year (1 day commitment).

- **Solution C/IMM (same as B except)**
 - Registration required to test prior to start of DY.
 - New registrations required to test on first active day
 - Test commitment changed from daily average during summer period to peak commitment day for DY

If approved, make effective 6/1/18 (start of next DY) – implementation more manageable

- **Summary**

- No significant support to change status quo.
- Support for Package A and B similar.
- Minimal support for Package C

Question	Yes	No	Abstain	#	%
1. Do you support Package * A – deadline changed from May 31 prior to start of Delivery Year to October 31 during the Delivery Year? -- Response	37	36	1	74	51%
2. Do you support Package B – Same as A except registration is open year round? -- Response	37	35	2	74	51%
3. Do you support Package C - IMM? -- Response	7	66	1	74	10%
4. Do you support the Status Quo? -- Response	50	22	2	74	69%
