

Special MIC – Distributed Energy Resources (DER)
 The Chase Center on The Riverfront
 October 18, 2017
 1:00 p.m. – 4:00 p.m. EDT

Distributed Energy Resource is a generation or electric energy storage resource connected at distribution voltages and/or connected behind a load meter.

Administration

1. Mr. Baker called the meeting to order, reviewed the agenda and ask for amendments to the agenda.
2. Mr. Gledhill will review meeting participation guidelines and the minutes from the October 2nd meeting. Attendance will be taken offline from a combination of in-person and WebEx attendees.

Consensus Based Issue Resolution Process

3. Scott Baker, PJM, led a discussion on the solutions matrix, highlighting changes to design components and options that had been made by PJM staff since the prior meeting. Discussions focused primary on design component 1 and its subcomponents, which relate to engineering studies and approval processes to become eligible for market participation. Stakeholders determined that the best course of action might be to separate the interconnection process portion as a distinct proposal.

Wrap-up and Future Agenda Items

4. Mr. Baker summarized action items: a) look into adding a design component to address a Distributed Energy Resource's mode of operation, and b) prepare materials to summarize proposals to address the interconnection process portion of the solution.
