

# Manual 19 – Revision 35

John Reynolds  
Resource Adequacy Planning  
Markets & Reliability Committee  
October 20, 2021

- Periodic cover-to-cover changes
- The proposed revisions are intended to:
  - Clean up outdated and/or redundant language
  - Correct grammar, spelling, punctuation, consistency of terms and document references
  - Add battery storage to the items forecasted

- Section 1.1: Cleaned up list of uses for PJM Hourly Load Data
- Section 2.1: Clarified PJM's ability to adjust submitted load data
- Section 3.1: Added battery storage to forecasted items
- Section 3.2: Whitepaper renamed Load Forecast Supplement
- Section 3.2: Removed obsolete PRD language
- Attachment A: Clarified when meter data needed for PRD
- Attachment C: Clarified sample design applies to capacity market registrations
- Attachment D: Corrected description of equation
- Attachment D: Removed obsolete notes.
