

Submitted to PJM OC on June 8, 2023 by the IMM

IMM package 1:

- The IMM recommends that PJM change the reporting of all transmission outage tickets as “on time” or “rescheduled” when an outage is rescheduled.

IMM package 2:

- The IMM recommends that PJM draft a clear definition of the congestion analysis required for transmission outage requests and associated triggers, including both the extent of overloaded facilities and the level of economic congestion, to include in Manual 3 after appropriate review.

IMM package 3:

- The IMM recommends that PJM create options for late requests based on the reasons, and modify the rules to reduce or eliminate the approval of late outage requests submitted or rescheduled after the FTR auction bidding opening date, based on those options.
- The IMM recommends that PJM not permit transmission owners to divide long duration outages into smaller segments to avoid complying with the requirements for long duration outages.
