

Markets Gateway Change - Rename 'Real Time Value'

As December 14, 2023

- On November 30, 2023, in Docket No. [EL21-78-000](#), the Commission directed PJM to replace Real Time Values with the ability for Market Sellers to submit temporary exceptions during the Operating Day.
 - The order noted that the Tariff and Operating Agreement revisions are effective as of November 30, 2023, when Real Time Values shall no longer be used.
 - Market Sellers may now submit real time temporary exceptions during the Operating Day.
- While updates to Markets Gateway are being made to streamline this change, we made an emergency change to the “Exception” tab on the “Parameter Limits” page in Markets Gateway to be compliant with the FERC order. The old name of “*Real Time Value*” exception type has been changed to “*Real Time Temp Except*”.

- Name change as shown in below screen shot: “*Real Time Temp Except*”
- None of the functions in the old ‘Real Time Value’ has been changed
- It does NOT affect the offer submission

The screenshot shows the PJM Markets Gateway interface. On the left is a navigation menu with categories like Bilaterals, Demand, Generator, and Public. The main area contains search filters for Start Day (12/6/2023), End Day (12/15/2023), Portfolio (Test), Location (VP HYBRID TEST UNIT 1 HB), and Status (All). A dropdown menu for Request Type is open, showing options: All, Daily, and Real Time Temp Except (which is highlighted). Below the filters is a table with columns: Request ID, Location, Min. MW, Max. MW, Min. Runtime, Max. Runtime, Min. Downtime, Max. Daily Starts, Max. Weekly Starts, Turn Down Ratio, Request Type, Start Date, and End Date.

- If a Real Time Value was submitted in the past using an XML file, the updated name required in the XML file should be changed to ***‘Real Time Temp Except’***.

```

<Envelope xmlns="http://schemas.xmlsoap.org/soap/envelope/">
  <Body>
    <SubmitRequest xmlns="http://emkt.pjm.com/emkt/xml">
      <ExceptionParameterLimits>
        <Location>11111101</Location>
        <MinimumRuntimeLimit>6</MinimumRuntimeLimit>
        <MinimumDowntimeLimit>8</MinimumDowntimeLimit>
        <MaximumDailyStartsLimit>2</MaximumDailyStartsLimit>
        <MaximumWeeklyStartsLimit>12</MaximumWeeklyStartsLimit>
        <TurnDownRatioLimit>1.2</TurnDownRatioLimit>
        <ColdStartupTimeLimit>1</ColdStartupTimeLimit>
        <IntermediateStartupTimeLimit>1</IntermediateStartupTimeLimit>
        <HotStartupTimeLimit>1</HotStartupTimeLimit>
        <ColdNotificationTimeLimit>0.5</ColdNotificationTimeLimit>
        <IntermediateNotificationTimeLimit>0.5</IntermediateNotificationTimeLimit>
        <HotNotificationTimeLimit>0.5</HotNotificationTimeLimit>
        <MaximumRuntimeLimit>24</MaximumRuntimeLimit>
        <RequestType>Real Time Temp Except</RequestType>
        <StartDate>2023-12-09</StartDate>
        <EndDate>2023-12-10</EndDate>
        <Status>Pending</Status>
        <Justification>Not a Temporary Exception</Justification>
      </ExceptionParameterLimits>
    </SubmitRequest>
  </Body>
</Envelope>
