

## PJM Product Specific Dispatch Business Rules

## 1) Manual Change (Manual 13)

PJM may dispatch Annual DR and Extended Summer DR prior to Limited DR to reserve Limited DR capability for other potential system emergencies based on following schedule:

Period	# of zonal (all Load Management products) events
Before 7/1	2
Before 8/1	4
Before 9/1	7

For example, if PJM declared 4 Emergency Load Management events in the PECO zone for load lead time resources by 7/15 than PJM may consider only dispatching Annual and Extended Summer DR if another system emergency arises prior to 8/1 of same delivery year.

## 2) OATT (attachment DD) and Manual 18 Changes

Load Management test penalty rate will be based on weighted average product revenue. This will ensure penalty rate for specific resources required to test will align with associated revenue.
