

2025/26 Interim Deliverability Study

June 2024 IPS

Kyle Copeland, Lead Engineer
Interconnection Planning Analysis

- PJM performs interim deliverability studies to ensure no impacts to the grid for the following three types of requests:
 - Projects requesting to come into service **prior to the case year** in which they were studied.
 - Projects requesting to come into service **prior to a required system reinforcement** (contingent facilities in ISA/GIA) **being placed in-service**.
 - Less than 5 year long term firm transmission service requests for service outside of the ATC Horizon

- **Requests** for interim deliverability study must be submitted to your PJM Project Manager by August 1st, 2024
- **Projects** must have an ISA/GIA and be projected in service prior to the start of the delivery year to be included in the study
- **Prioritized** via New Service Request number and study will be performed serially
- **Results** will be provided in October 2024
