

Resource Adequacy Analysis Subcommittee
WebEx/Conference Call
June 27, 2022
9:00 a.m. – 10:00 a.m. EPT

Administration

Mr. Falin opened the meeting and reviewed the agenda. The meeting minutes from the October 4, 2021 meeting were approved and will be posted as final.

2022 Load Model Time Period Analysis

Mr. Gledhill reviewed detailed results of analysis performed by PJM staff regarding the selection of a load model time period for both PJM and the World regions. The analysis focused on the 2026/2027 Delivery Year and followed the procedure approved by the Planning Committee at its July, 2009 meeting.

PJM recommended an 11 year load model based on the years 2000-2010 for use in the 2022 RRS Base Case.

PJM also recommended that the World peak be switched to a different July week so that PJM and World peak on the same month but not on the same week.
