

## DECEMBER 18 ENHANCEMENTS

- New functionality to implement future model build with effective date in eDART.
- Expansion of eDART equipment model to include loads.
- Retirement of 'dcurvetrans', 'dcurvegen' and 'ratingscsv' XML downloads – now available via the UI reports.
- Changes to Transmission Facilities Outage List (linesout file)

## 2020 EHNACEMENTS

- Voltage Limits - new tool for Transmission users to view and update current voltage limits on buses.
- Inclusion of Takeout & Restore Equipment on Transmission tickets.
- Inclusion of Cut-In Task Status on Transmission Tickets

## COMPANY DISTRIBUTED WORKFLOW (CDW) UPDATE

- For companies interested in using the CDW functionality:
  - Contact eDART team to be set up in Sandbox.
  - Provide contact information of company officer to sign the required paperwork for Production set up.

## OTHER DISCUSSION TOPICS

- December 2019 enhancements discussed during December eDART Forum meeting: <https://pjm.com/committees-and-groups/tech-change-forum/edart-forum>
- eDART Forum – Transmission meeting scheduled for January 14 to review Voltage Limits tool.
- Removal of eDART User Group and eDART XML User Group pages on pjm.com.
- Changes to Complete Descriptions file (<https://pjm.com/-/media/etools/oasis/system-information/eqp-info.ashx?la=en>):
  - Removed extra columns with numbers
  - End of January: Column headers to be edited and Timestamp added
- Q3 2020 restriction on how frequently the Transmission Facilities Outage List files (linesout.txt and linesout\_new.txt) can be accessed.
  - The files were designed to be easily read by users
  - Several users are now using programs to scrape the data from the files constantly. These users should utilize the eDART XML download option.
  - Users will only be able to complete a download when there is new data or every 5 minutes, whichever is sooner.
