The Honorable Kimberly D. Bose Secretary Federal Energy Regulatory Commission 888 First Street, N.E. Washington, D.C. 20426

Re: Potomac-Appalachian Transmission Highline, LLC Informational Filing Transmission Formula Rate Annual Update for Rate Year 2013 Docket No. ER09-1256-___

Dear Secretary Bose:

Potomac-Appalachian Transmission Highline, LLC ("PATH LLC"), on behalf of its operating companies PATH West Virginia Transmission Company, LLC ("PATH-WV") and PATH Allegheny Transmission Company, LLC ("PATH-Allegheny"), hereby submits for informational purposes only its Annual Update to recalculate its annual transmission revenue requirement ("Annual Update") for Rate Year 2013.

This Annual Update is submitted pursuant to the Formula Rate Implementation Protocols ("Protocols") set forth in Attachment H-19B of the PJM Open Access Transmission Tariff ("PJM OATT").¹ As provided in section III.B.1 of the Protocols, this Annual Update is an informational filing, and therefore does not require any Commission action.

DESCRIPTION OF FILING

PATH LLC recovers its transmission revenue requirement through a formula rate that is designated as Attachment H-19A under the PJM OATT. Pursuant to section III.B.(1) of the Protocols, on or about June 1 of each year, PATH LLC is required to submit its Annual Update as an informational filing to FERC and post the same on the PJM website. The Annual Update calculates PATH LLC's Actual Transmission Revenue Requirement for the preceding Rate Year in accordance with the terms of the formula rate and the Protocols, as well as a True-up Adjustment for the preceding Rate Year.

1

PJM Interconnection, L.L.C., FERC Electric Tariff, Sixth Revised Volume No. 1.

The Honorable Kimberly D. Bose June 2, 2014 Page 2

Annual Update

This Annual Update filing, calculates PATH LLC's Actual Transmission Revenue Requirement and True-up Adjustment for the 2013 Rate Year, which ended on December 31, 2013. Each input to the formula rate is either taken directly from the FERC Form No. 1 or reconcilable to the FERC Form No. 1 by the application of clearly identified and supported information. The Annual Update is subject to the review procedures set forth in Article VI of the Protocols.

Consistent with the Protocols, the Annual Update attached hereto includes the following materials:

- 1. Attachment A True-up Adjustment: Comparison of Actual Revenue Requirement to the Projected Transmission Revenue Requirement for Year Ended December 31, 2013.
- 2. Attachment B PATH LLC Formula (Attachment H-19A) populated with 2013 Actual Transmission Revenue Requirement.
- 3. Attachment C PATH-WV Historic Operations and Maintenance Report for year ended December 31, 2013.²
- 4. Attachment D PATH-Allegheny Historic Operations and Maintenance Report for year ended December 31, 2013.³
- 5. Attachment E PATH-WV Historic Capital Investment for 2013.⁴
- 6. Attachment F PATH-Allegheny Historic Capital Investment for 2013.⁵
- 7. Attachment G 2013 Annual Report on Construction Work in Progress.⁶

Pursuant to section III.B.(3)(g) of the Protocols, PATH LLC states that the major factor causing a change in the Actual Transmission Revenue Requirement between the Annual Update and the prior year's Annual Update is the inclusion of 12 months of the 60 month amortization of abandonment costs for the PATH project in the current year. The prior year's Annual Update included only 4 months of amortization because amortization commenced on September 1, 2012.

5

² See Protocols, Section III.B.(3)(e).

⁴ *See* Protocols, Section III.B.(3)(f).

Id.

⁶ See Protocols, Section V.B.

The Honorable Kimberly D. Bose June 2, 2014 Page 3

The Annual Update contains no expenses or costs that have been alleged or judged in any administrative or judicial proceeding to be illegal, duplicative, or unnecessary costs that are demonstrably the product of discriminatory employment practices, as defined in 18 C.F.R. § 35.13(b)(7).

Pursuant to section III.C.(3) of the Protocols, upon written request by any party to FERC Docket No. ER08-386 or any Interested Party, PATH LLC will promptly make available to such entity and/or a consultant designated by it, a "workable" Excel file containing the same data, provided that the party has provided PATH LLC with a current electronic mail address.

Posting

The Annual Update has been submitted to PJM for posting on its website. PJM will post a copy of this filing to the transmission service formula rates section of its internet site, located at:

http://www.pjm.com/markets-and-operations/transmission-service/formula-rates.aspx

with a specific link to the newly-filed document, and will send an email on the same date as this filing to all PJM Members and all state utility regulatory commissions in the PJM Region alerting them that this filing has been made today and is available by visiting the website provided above.

Open Meeting

Pursuant to section III.C.(1) of the Protocols, within two business days of this filing PATH LLC shall provide notice on PJM's website of the time, date and location of an open meeting among Interested Parties.

Attachment A Rate Formula Template Utilizing FERC Form 1 Data

For the 12 months ended 12/31/2013

General Note: References to pages in this formulary rate are indicated as: (page#, line#, col.#) References to data from FERC Form 1 are indicated as: #.y.x (page, line, column)

Note Letter

- A The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note F. Account 281 is not allocated.
- B Identified in Form 1 as being only transmission related.

C Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission

- Prepayments are the electric related prepayments booked to Account No. 165 and reported on Pages 110-111 line 57 in the Form 1.
- D EPRI Annual Membership Dues listed in Form 1 at 353.f, all Regulatory Commission Expenses itemized at 351.h, except safety, education and out-reach related advertising included in Account 930.1. Regulatory Commission Expenses directly related to transmission service, ISO filings, or transmission siting itemized at 351.h.
- E Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere.
- F The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T) (page 4, line 79). Inputs Required:

Inputs Required:	

35.00%
7.00%
0.000/

7.00% (State Income Tax Rate or Composite SIT from Attachment 4)

- p = 0.00% (percent of federal income tax deductible for state purposes) G Bemoves dollar amount of transmission expenses included in the OATT ancillary services rates if any
- G Removes dollar amount of transmission expenses included in the OATT ancillary services rates, if any.
 H Removes dollar amount of transmission plant included in the development of OATT ancillary services rates ar

SIT=

H Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.

I Enter dollar amounts

J The ROE consists of a base ROE of 10.40%, a 50 basis point adder for participation in PJM and a 150 basis point Incentive ROE adder. No change in ROE may be made absent a Section 205 or 206 filing with FERC and no filing to change the ROE may be made by a Settling Party or Non-Opposing Party (as defined in the Settlement Agreement filed on October 7, 2011 in Docket No. ER08-386-000, et al.) except in accordance with the provisions of Section 3.2 of the Settlement Agreement. Subject to rehearing of the November 30, 2012 Hearing Order in Docket No. ER12-2708-000, the post abandonment ROE will be 10.9% beginning September 1, 2012 and 10.4% beginning December 1, 2012. The 2012 true-up will be computed using an ROE that is a time-weighted average of the pre-abandonment ROE (i.e., 12.4%) and the allowed post abandonment ROE. Example Calculation: For the first 244 days the authorized ROE will be 12.4%, for the next 91 days the ROE will be 10.9%, and for the remaining 31 days the ROE will be 10.4%. Therefore, the weighted ROE = (12.4% * 244 + 10.9% * 91+10.4% * 31)/366=11.858%. Beginning with 2013 and through the remainder of the amortization period the ROE will be 10.4%.

K The percentage shown for Long Term Debt is subject to the Annual Update and Attachment 6 and Attachment 9.

SUPPORTING CALCULATIONS AND NOTES

Attachment A Rate Formula Template Utilizing FERC Form 1 Data

For the 12 months ended 12/31/2013

PATH Allegheny Transmission Company, LLC

General Note: References to pages in this formulary rate are indicated as: (page#, line#, col.#) References to data from FERC Form 1 are indicated as: #.y.x (page, line, column)

Note

Letter

- A The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note F. Account 281 is not allocated.
- B Identified in Form 1 as being only transmission related.

Formula Rate - Non-Levelized

- C Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission
- Prepayments are the electric related prepayments booked to Account No. 165 and reported on Pages 110-111 line 57 in the Form 1.
- D EPRI Annual Membership Dues listed in Form 1 at 353.f, all Regulatory Commission Expenses itemized at 351.h, except safety, education, siting and out-reach related advertising included in Account 930.1. Regulatory Commission Expenses directly related to transmission service, ISO filings, or transmission siting itemized at 351.h.
- E Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere.
- F The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T) (page 9, line 79).

Inputs Required:	FIT =	35.00%	
	SIT=	3.80%	(St
	p =	0.00%	(pe

3.80% (State Income Tax Rate or Composite SIT from Attachment 4) 0.00% (percent of federal income tax deductible for state purposes)

G Removes dollar amount of transmission expenses included in the OATT ancillary services rates, if any.

H Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.

- I Enter dollar amounts
- J The ROE consists of a base ROE of 10.40%, a 50 basis point adder for participation in PJM and a 150 basis point Incentive ROE adder. No change in ROE may be made absent a Section 205 or 206 filing with FERC and no filing to change the ROE may be made by a Settling Party or Non-Opposing Party (as defined in the Settlement Agreement filed on October 7, 2011 in Docket No. ER08-386-000, et al.) except in accordance with the provisions of Section 3.2 of the Settlement Agreement. Subject to rehearing of the November 30, 2012 Hearing Order in Docket No. ER12-2708-000, the post abandonment ROE will be 10.9% beginning September 1, 2012 and 10.4% beginning December 1, 2012. The 2012 true-up will be computed using an ROE that is a time-weighted average of the pre-abandonment ROE (i.e., 12.4%) and the allowed post abandonment ROE. Example Calculation: For the first 244 days the authorized ROE will be 12.4%, for the next 91 days the ROE will be 10.9%, and for the remaining 31 days the

ROE will be 10.4%. Therefore, the weighted ROE = (12.4% * 244 + 10.9% * 91+10.4% * 31)/366=11.858%. Beginning with 2013 and through the remander of the amortization period the ROE will be 10.4%.

- K The percentage shown for Long Term Debt is subject to the Annual Update and Attachment 6 and Attachment 9.
- L Total Administrative and General expense for 2013 includes direct labor charges from FirstEnergy Service Company of \$126,083. Through the end of the first quarter of 2012, direct labor charges by Allegheny Energy Service Corporation were included in Transmission Salaries and Wages.

those revenues entered here		-
Income Taxes associated with revenues in line 15		-
5 One half margin (line 13 - line 14)/2		
All expenses (other than income taxes) associated with revenues in line 13 that are		
included in FERC accounts recovered through the formula times the allocator used to		
functionalize the amounts in the FERC account to the transmission service at issue.		
7 Line 15 plus line 16		-
Line 13 less line 17		

- Note 1 All revenues related to transmission that are received as a transmission owner (i.e., not received as a LSE), for which the cost of the service is recovered under this formula, except as specifically provided for elsewhere in this attachment or elsewhere in the formula will be included as a revenue credit or included in the peak on page 2, line 2 of Rate Formula Template.
- Note 2 If the costs associated with the Directly Assigned Transmission Facility Charges are included in the Rates, the associated revenues are included in the Rates. If the costs associated with the Directly Assigned Transmission Facility Charges are not included in the Rates, the associated revenues are not included in the Rates.
- Note 3 Ratemaking treatment for the following specified secondary uses of transmission assets: (1) right-of-way leases and leases for space on transmission facilities for telecommunications; (2) transmission tower licenses for wireless antennas; (3) right-of-way property leases for farming, grazing or nurseries; (4) licenses of intellectual property (including a portable oil degasification process and scheduling software); and (5) transmission maintenance and consulting services (including energized circuit maintenance, high-voltage substation maintenance, safety training, transformer oil testing, and circuit breaker testing) to other utilities and large customers (collectively, products). DLC will retain 50% of net revenues consistent with <u>Pacific Gas and Electric Company</u>, 90 FERC ¶ 61,314. Note: in order to use lines 15 20, the utility must track in separate subaccounts the revenues and costs associated with each secondary use (except for the cost of the associated income taxes).
- Note 4 If the facilities associated with the revenues are not included in the formula, the revenue is shown here, but not included in the total above and explained in the Cost Support. For example revenues associated with distribution facilities. In addition Revenues from Schedule 12 are not included in the total above to the extent they are credited under Schedule 12.

Attachment 6 - Financing Costs for Long Term Debt using the Internal Rate of Return Methodology -- PATH-WV HYPOTHETICAL EXAMPLE

PATH anticipates its financing will be a 7 year loan, where by PATH pays Origination Fees of \$7.9 million and a Commitments Fee of 0.375% on the undrawn principle. Consistent with GAAP, PATH will amortize the Origination Fees and Commitments Fees using the standard Internal Rate of Return formula below. Each year, PATH will true up the amounts withdrawn, the interest paid in the year, Origination Fees, Commitments Fees, and total loan amount on this attachment.

1 The IRR is the Debt Cost shown on Page 5, Line 118 of Rate Formula Template.

² The IRR is a discount rate that makes the net present value of a series of cash flows equal to zero. The IRR equation can only be solved through iterations performed by a computer program (i.e.NPV function with goal seek in a spreadsheet program).

Attachment 6 - Financing Costs for Long Term Debt using the Internal Rate of Return Methodology -- PATH-Allegheny

HYPOTHETICAL EXAMPLE

PATH anticipates its financing will be a 7 year loan, where by PATH pays Origination Fees of \$4.2 million and a Commitments Fee of 0.375% on the undrawn principle. Consistent with GAAP, PATH will amortize the Origination Fees and Commitments Fees using the standard Internal Rate of Return formula below. Each year, PATH will true up the amounts withdrawn, the interest paid in the year, Origination Fees, Commitments Fees, and total loan amount on this attachment.

1 The IRR is the Debt Cost shown on Page 10, Line 118 of Rate Formula Template.

² The IRR is a discount rate that makes the net present value of a series of cash flows equal to zero. The IRR equation can only be solved through iterations performed by a computer program (i.e.NPV function with goal seek in a spreadsheet program).

Attachment G 2013 Annual Report on Construction Work in Progress

Annual Report on Construction Work in Progress Pursuant to Section V.B. of Implementation Protocols

PATH-WV

- 1. The actual amount of CWIP recorded at December 31, 2013 for PATH-WV is zero dollars due to CWIP being transferred to Account 182.2, Unrecovered Plant and Regulatory Study Costs, as instructed in the FERC order issued November 30, 2013.
- 2. No AFUDC has been included in the CWIP balance relating to year 2013.
- 3. The resulting effect of AFUDC on the CWIP revenue requirement is zero.
- 4. Please see 5 below for the current status of the PATH-WV project.
- 5. On August 24, 2012, the PJM Board of Managers announced that it had decided to cancel the PATH Project. On September 28, 2012, the PATH Companies submitted to FERC a filing pursuant to Section 205 of the Federal Power Act to allow for recovery of prudently-incurred abandoned plant costs associated with the PATH Project. On November 30, 2012, FERC accepted in part and rejected in part the proposed rates effective December 1, 2012, and set them for hearing and settlement judge proceedings, subject to nominal suspension and refund. FERC found that the PATH Companies are eligible to recover their prudently-incurred costs associated with the abandonment of the PATH Project, and granted their request to recover those costs. Settlement conferences concluded on March 19, 2014 with the settlement judge declaring an impasse. Hearing proceedings are underway.

PATH-Allegheny

- 1. The actual amount of CWIP recorded at December 31, 2013 for PATH-WV is zero dollars due to CWIP being transferred to Account 182.2, Unrecovered Plant and Regulatory Study Costs, as instructed in the FERC order issued November 30, 2013.
- 2. No AFUDC has been included in the CWIP balance relating to year 2013.
- 3. The resulting effect of AFUDC on the CWIP revenue requirement is zero.
- 4. Please see 5 below for the current status of the PATH-Allegheny project.
