# Re: Trans-Allegheny Interstate Line Company Informational Filing 2021 Formula Rate Annual Update Docket No. ER07-562-000

Dear Secretary Bose:

Pursuant to the Commission's order dated May 31, 2007 in Docket No. ER07-562-000<sup>1</sup> and the uncontested settlement approved by the Commission in an order dated July 21, 2008 in Docket No. ER07-562-004,<sup>2</sup> Trans-Allegheny Interstate Line Company ("TrAILCo") hereby submits for informational purposes its 2021 Annual Update to recalculate its annual transmission revenue requirements ("Annual Update").

The Annual Update includes (i) a reconciliation of the annual transmission revenue requirements for the 2020 Rate Year<sup>3</sup> (Attachment 1), (ii) the annual transmission revenue requirements for the 2021 Rate Year to become effective on June 1, 2021 (Attachment 2), and (iii) a detailed accounting of transfers between construction work in progress ("CWIP") and Plant in Service as required by the May 31 Order (Attachment 3).

### DWT.COM

<sup>1</sup> Trans-Allegheny Interstate Line Co., 119 FERC ¶ 61,219, at P 59 (2007) ("May 31 Order").

<sup>&</sup>lt;sup>2</sup> *Trans-Allegheny Interstate Line Co.*, 124 FERC ¶ 61,075 (2008).

<sup>&</sup>lt;sup>3</sup> The "Rate Year" begins on June 1 of a given calendar year and continues through May 31 of the subsequent calendar year.

Honorable Kimberly D. Bose May 17, 2021 Page 2

## I. Background

TrAILCo's formula rate implementation protocols ("Protocols") on file with the Commission specify in relevant part that:

On or before May 15 of each year, TrAILCo shall recalculate its Annual Transmission Revenue Requirements, producing the "Annual Update" for the upcoming Rate Year, and post such Annual Update of PJM's Internet website via link to the Transmission Services page or a similar successor page. The Annual Update, which shall show separately the transmission revenue requirement for each TrAILCo facility listed in Schedule 12 – Appendix as subject to these procedures, shall also be provided to FERC in an informational filing.

If the date for making the Annual Update posting/filing should fall on a weekend or a holiday recognized by the FERC, then the posting/filing shall be due on the next business day.<sup>4</sup>

# II. Description of Filing

As required under the Protocols, TrAILCo is submitting the Annual Update with the Commission as an informational filing. Concurrently, TrAILCo also will submit the Annual Update to PJM for posting on its Internet website via link to the Formula Rates page that includes a recalculation of TrAILCo's annual transmission revenue requirements.<sup>5</sup>

The Annual Update contains no expenses or costs that have been alleged or judged in any administrative or judicial proceeding to be illegal, duplicative, or unnecessary costs that are demonstrably the product of discriminatory employment practices, as defined in 18 C.F.R. § 35.13(b)(7) (2020). In addition, please note that TrAILCo has made no material changes in its accounting policies and practices from those in effect during the previous Rate Year and upon which TrAILCo's current revenue requirements are based.

As specified in Section 1 of the Protocols, this filing is informational only. Any challenges to the implementation of the TrAILCo formula rate must be made through the challenge procedures described in Sections 3 and 4 of the Protocols or in a separate complaint proceeding, and not in response to this Informational Filing.

<sup>&</sup>lt;sup>4</sup> PJM Interconnection, L.L.C., Open Access Transmission Tariff as filed with the Commission in Docket No. ER10-2710 on September 17, 2010, Attachment H-18B, Sections 1(b) and 1(c), as amended in Docket No. ER11-2801 (effective September 17, 2010).

### Notes

- B Electric portion only B For both the estimate and the reconciliation, Construction Work In Progress ("CWIP") and leases that are expensed as O&M (rather than amortized) are excluded. For the Estimate Process:
- Transmission plant in service will show the end of year balance and is linked to Attachment 5 which shows detail support by project
- The transmission plant will agree to or be reconciled to the FERC Form 1 balance for the transmission plant. New Transmission Plant expected to be placed in service in the current calendar year will be based on the average of 13 monthly investment costs
- and shown separately detailed by project on Attachment 6. Accumulated depreciation will show the end of year balance and is linked to Attachment 5 which shows detail support by project.
- CWIP will be linked to Attachment 6 which shows detail support by project (incentive and non-incentive).
- For the Reconciliation Process:
- Transmission plant in service will be calculated using a 13 month average balance and will be detailed on Attachment 5. This includes new transmission plant added to plant-in-service
- Accumulated depreciation will be calculated using a 13 month average balance and will be detailed on Attachment 5. This includes accumulated depreciation associated with current year transmission plant.

- CWIP will be linked to Attachment 6 which shows detail support by project (incentive and non-incentive). Includes Transmission portion only and (i) only land that has an estimated in-service date within 10 years may be included and (ii) a plan for the land's use is required to be included С in the filing whenever the cost of the land is proposed to be included in rates. D Excludes all EPRI Annual Membership Dues
- Excludes all Regulatory Commission Expenses Е
- Includes Safety related advertising included in Account 930.1
- B Includes Regulatory Commission Expenses directly related to transmission service, RTO filings, or transmission siting itemized in Form 1 at 351.h.
   H The currently effective income tax rate where FIT is the Federal income tax rate; SIT is the State income tax rate, and p =
- the percentage of federal income tax deductible for state income taxes. If the utility includes taxes in more than one state, it must explain in Attachment 5 the name of each state and how the blended or composite SIT was developed.
- ROE will be established in the Commission order accepting the settlement in Docket No. ER07-562 and no change in ROE will be made absent a Section 205 or Section 206 filing at FERC. Education and outreach expenses relating to transmission, for example siting or billing
- K As provided for in Section 34.1 of the PJM OATT; the PJM established billing determinants will not be revised or updated in the annual rate reconciliations. L Amount of transmission plant excluded from rates per Attachment 5.

- M Payments made under Schedule 12 of the PJM OATT that are not directly assessed to load in the Zone under Schedule 12 are included in Transmission O&M on Line 47. If they are booked to Acct 565, they are included on Line 50. Copies of PJM invoices will be provided upon request. N The capital structure will remain 50% equity and 50% debt until construction of all of the segments of the TrAIL Project is completed and the entire TrAIL Project is placed in service. The first year that these projects are in service the formula will be run based on the 50/50 capital structure and on the actual year end capital structure. The two results will be weighted based on: the number of days the last project was in service and 365 day minus the numbers of days the last project was in service divided by 365 days. This can be illustrated using the following example:

#### Example:

Assume Last Project goes into service on day 260.

Hypothetical Capital Structure until the last project goes into service is 50/50. Assume Year End actual capital structure is 60% equity and 40% debt.

Therefore: Weighted Equity = [50%\*260+60%\*(365-260)]/365

#### Instructions for Account 190:

ADT items related only to Retail Related Operations are directly assigned to Column C.
 ADT items related only to Non-Electric Operations (e.g., Gas, Water, Severy) or Production are directly assigned to Column D.
 ADT items related only to Transmission and encity assigned to Column C.
 ADT items related to Not Tansmission and encity assigned to Column C.
 ADT items related to Not Tansmission and encity assigned to Column C.
 ADT items related to Not Tansmission and encity assigned to Column C.
 ADT items related to Not Tansmission and encity assigned to Column C.
 ADT items related to Not Tansmission and encity assigned to Column C.
 Stati Tansmission and encity assigned to Column C.
 Column C.
 Defend income tases arise when fitems are included in taxable income in different periods than they are included in rates. Therefore, if the item giving rise to the ADT is not included in the formula, the associated ADT amount shall be encluded.

#### 22 Difference (Line 20 - Line 21)

Criteria for Allocation:

- Other taxes that are incurred through ownership of plant including transmission plant will be allocated based on the Gross Plant А Allocator. If the taxes are 100% recovered at retail they shall not be included.
- В Other taxes that are incurred through ownership of only general or intangible plant will be allocated based on the Wages and Salary Allocator. If the taxes are 100% recovered at retail they shall not be included.

43,240,203

- С
- Other taxes that are assessed based on labor will be allocated based on the Wages and Salary Allocator. Other taxes except as provided for in A, B and C above, that are incurred and (1) are not fully recovered at retail or (2) are directly or indirectly related to transmission service will be allocated based on the Gross Plant Allocator; provided, however, that D overheads shall be treated as in footnote B above. Excludes prior period adjustments in the first year of the formula's operation and reconciliation for the first year.

	Revenue Adjustment to determine Revenue Credit	, , , , , , , , , , , , , , , , , , ,		
14b 14c 14d 14e 14f 14g 15	Revenues associated with lines 14b-g are to be included in lines 2-10 and total of those revenues entered here Costs associated with revenues in line 14a Net Revenues (14a - 14b) 50% Share of Net Revenues (14c / 2) Costs associated with revenues in line 14a that are included in FERC accounts recovered through the formula times the allocator used to functionalize the amounts in the FERC account to the transmission service at issue. Net Revenue Credit (14d + 14e) Line 14a less line 14f Amount offset in line 4 above Total Account 454 and 456		- - - - - - - - - - - - - - - - - - -	
17	Note 1: All revenues related to transmission that are received as a transmission owner (i.e., not received as a LSE), for which the cost of the service is recovered under this formula, except as specifically provided for elsewhere in this Attachment or elsewhere in the formula will be included as a revenue credit or included in the peak on line 178 of Appendix A.			
18	Note 2: If the costs associated with the Directly Assigned Transmission Facility Charges are included in the Rates, the associated revenues are included in the Rates. If the costs associated with the Directly Assigned Transmission Facility Charges are not included in the Rates, the associated revenues are not included in the Rates.			
19	Note 3: Ratemaking treatment for the following specified secondary uses of transmission assets: (1) right-of-way leases and leases for space on transmission facilities for telecommunications; (2) transmission tower licenses for wireless antennas; (3) right-of-way property leases for farming, grazing or nurseries; (4) licenses of intellectual property (including a portable oil degasification process and scheduling software); and (5) transmission maintenance and consulting services (including energized circuit maintenance, high-voltage substation maintenance, safety training, transformer oil testing, and circuit breaker testing) to other utilities and large customers (collectively, products). Company will retain 50% of net revenues consistent with Pacific Gas and Electric Company, 90 FERC ¶ 61,314. Note: in order to use lines 14a - 14g, the utility must track in separate subaccounts the revenues and costs associated with each secondary use (except for the cost of the associated income taxes).	I		
20	Note 4: If the facilities associated with the revenues are not included in the formula, the revenue is shown here, but not included in the total above and explained in the Cost Support. For example revenues associated with distribution facilities. In addition Revenues from Schedule 12 of the PJM OATT are not included in the total above to the extent they are credited under Schedule 12 of the PJM OATT.

### Attachment 5a - Pre-Commercial Costs and CWIP

Step 1 Totals reported below are by project with the amounts to be expensed reported separately from those to be deferred and amortized (note, deferred costs related to 2006 include AFUDC).

For Forecasting purposes, Pre-Commercial expenses will be estimated. Total deferred and amortized Pre-commercial costs will be the actual amount agreeing to FERC Form 1 and Attachment 5.

For each project, where CWIP is to be recovered in rate base, CWIP will be estimated and the totals reported below by project. For the Reconciliation, for each project where CWIP is to be recovered in rate base the CWIP will be itemized by project below. Additionally, the amount of AFUDC that would have been capitalized for projects where CWIP is included in rate base will be reported in the FERC Form No. 1.

For the Reconciliation, the total additions to plant in service for that year will be summarized by project to demonstrate no Pre-Commercial costs expensed were included in the additions to plant in service and AFUDC on projects where CWIP was recovered in rate base was included in the additions to plant in service. The Pre-commercial expenses are actual expenses incurred for the reconciliation year. Total deferred and amortized Pre-commercial costs will be the actual amount Step 3 agreeing to FERC Form 1 and Attachment 5.

 Small projects may be combined into larger projects where rate treatment is consistent. Pre-Commercial costs benefiting multiple projects will be allocated to projects based on the estimated plant in service of each project.

Allocation of Pre-Commercial Costs	Plant in Service	Allocation
	(Estimated 2/12/2008)	
Prexy - 502 Junction 138 kV (CWIP)	94,140,000	0.10734
Prexy - 502 Junction 500 Kv (CWIP)	121,260,000	0.13827
502 Junction - Territorial Line (CWIP)	661,600,000	0.75439
Total	877,000,000	1.00000

2 Column D is the total CWIP balance including any AFUDC, Column E is the AFUDC if any in Column D, and Column F is the AFUDC that would have been in Column E if CWIP were not recovered in rate base.

### Attachment 6 - Estimate and Reconciliation Worksheet

Exec	Summarv		
1	April	Year 2	TO populates the formula with Year 1 data
2	April	Year 2	TO estimates all transmission Cap Adds and CWIP for Year 2 based on each project's cost using the average of 13 monthly balances. Cap Adds are the projects expected to be in service in Year 2.
3	April	Year 2	TO adds Cap Adds and CWIP to plant in service in Formula (Appendix A, Lines 16 and 33)
4	May	Year 2	Post results of Step 3 on PJM web site
5	June	Year 2	Results of Step 3 go into effect
6 7	April April	Year 3 Year 3	TO estimates all transmission Cap Adds and CWIP during Year 3 based each project's cost using the average of 13 monthly balances. Cap Adds are expected be in service in Year 3. Reconciliation - TO calculates Reconciliation by populating the 13 monthly plant balances and beginning and end of year balances for the other rate base items and the 13 monthly averages for CWIP in Reconciliation (adjusted to include any Reconciliation amount from prior year).
8	April	Year 3	Reconciliation - TO adds the difference between the Reconciliation in Step 7 and the forecast in Step 5 with interest to the result of Step 7 (this difference is also added to Step 7 in the subsequent year)
9	May	Year 3	Post results of Step 8 on PJM web site
10	June	Year 3	Results of Step 8 go into effect
_			

#### Reconciliation Details

Step Month Year

#### 1 April Year 2 TO populates the formula with Year 1 data Rev Reg based on Year 1 data

Action

### Must run Appendix A to get this number (without any cap adds in Appendix A line 16 and without CWIP in Appendix A line 33)

2 April Year 2 TO estimates all transmission Cap Adds and CWIP for Year 2 based on each project's cost using the average of 13 monthly balances. Cap Adds are the projects expected to be in service in Year 2.

For Plant in Service "Pre-Commercial Exp" is equal to the amount of pre-commercial expense on Attachment 5a for each project expensed in year and amortized in year. Revenue is equal to the "Return" ("Investment" times FCR) plus "Depreciation" plus "Pre-Commercial Exp" plus pror year "Reconciliation amount" "Reconciliation Amount" is created in the reconciliation in Attachment 6 and included in the forecasted revenue requirement.

#### Attachment 9 - Financing Costs for Long Term Debt using the Internal Rate of Return Methodology

New Borrowing 0.005

TrALCo anticipates its financing will be a 7 year loan, where by TrALCo pays Origination Fees of \$5.2 million and a Commitments Fee of 0.3% on the undrawn principle. Consistent with GAAP. TrALCo will amoritize the Origination Fees and Commitments Fees using the standard Internal Pate of Ream formula below. Each year, TrALCo will bre up the amounts withdrawn, the interest paid in the year. Origination Fees, Commitments Fees, and total loan amount on this attachment.

Total Loan Amount	\$ 900,0	000,000
Internal Rate of Return <sup>1</sup>	4.8	86348%
Based on following Financial Formula <sup>2</sup> :		
NPV = 0 = $\sum_{t=1}^{N} C_t / (1 + $	IRR)pwr(t)	
Vrigination Fees		7,780,954
Addition Origination Fees		15,125
Total Issuance Expense	7	7,796,079

Revolving Credit Commitment Fee Revolving Credit Commitment Fee Old Borrowing 0.0050 0.0037 After borrowing is at the midpoint (\$275,000)

#### Attachment 9 - Financing Costs for Long Term Debt using the Internal Rate of Return Methodology

TrALCo anticipates its financing will be a 7 year loan, where by TrALCo pays Origination Fees of \$5.2 million and a Commitments Fee of 0.3% on the undrawn principle. Consistent with GAAP. TrALCo will amonize the Origination Fees and Commitments Fees using the standard Internal Fate of Feature Immution with the interest paid in the year. Origination Fees, Commitments Fees, and total loan amount on this attachment.

		\$	900,000,000
Internal Rate of Return <sup>1</sup>			4.886348%
Based on following Financial Formula <sup>2</sup> :			
$NPV = 0 = \sum_{t=1}^{N} C_t /$	(1+ <i>IRR</i> )p	wr	(†)

Origination Fees		
Origination Fees		7,780,954
Addition Origination Fees		15,125
Total Issuance Expense		7.796.079
	New Borrowing	Old Borrowing
Revolving Credit Commitment Fee	0.005	0.0050

Revolving Credit Commitment Fee

#### 0.0050 0.0037 After borrowing is at the midpoint (\$275,000)

#### Attachment 9 - Financing Costs for Long Term Debt using the Internal Rate of Return Methodology

TrALCo anticipates its financing will be a 7 year loan, where by TrALCo pays Origination Fees of \$5.2 million and a Commitments Fee of 0.3% on the undrawn principle. Consistent with GAAP. TrALCo will amoritize the Origination Fees and Commitments Fees using the standard Internal Pate of Ream formula below. Each year, TrALCo will bre up the amounts withdrawn, the interest paid in the year. Origination Fees, Commitments Fees, and total loan amount on this attachment.

Total Loan Amount		\$	900,000,000
nternal Rate of Retu	rn <sup>1</sup>		4.886348%
Based on following I	inancial Formula <sup>2</sup> :		
NPV = 0 =	$\sum_{t=1}^{N} C_t / (1 + IRR) p$	owr	( <i>t</i> )

#### Notes

- B Electric portion only B For both the estimate and the reconciliation, Construction Work In Progress ("CWIP") and leases that are expensed as O&M (rather than amortized) are excluded. For the Estimate Process:
- Transmission plant in service will show the end of year balance and is linked to Attachment 5 which shows detail support by project
- The transmission plant will agree to or be reconciled to the FERC Form 1 balance for the transmission plant. New Transmission Plant expected to be placed in service in the current calendar year will be based on the average of 13 monthly investment costs
- and shown separately detailed by project on Attachment 6. Accumulated depreciation will show the end of year balance and is linked to Attachment 5 which shows detail support by project.
- CWIP will be linked to Attachment 6 which shows detail support by project (incentive and non-incentive).
- For the Reconciliation Process:
- Transmission plant in service will be calculated using a 13 month average balance and will be detailed on Attachment 5. This includes new transmission plant added to plant-in-service
- Accumulated depreciation will be calculated using a 13 month average balance and will be detailed on Attachment 5. This includes accumulated depreciation associated with current year transmission plant.

- CWIP will be linked to Attachment 6 which shows detail support by project (incentive and non-incentive). Includes Transmission portion only and (i) only land that has an estimated in-service date within 10 years may be included and (ii) a plan for the land's use is required to be included С in the filing whenever the cost of the land is proposed to be included in rates. D Excludes all EPRI Annual Membership Dues
- Excludes all Regulatory Commission Expenses Е
- Includes Safety related advertising included in Account 930.1
- B Includes Regulatory Commission Expenses directly related to transmission service, RTO filings, or transmission siting itemized in Form 1 at 351.h.
   H The currently effective income tax rate where FIT is the Federal income tax rate; SIT is the State income tax rate, and p =
- the percentage of federal income tax deductible for state income taxes. If the utility includes taxes in more than one state, it must explain in Attachment 5 the name of each state and how the blended or composite SIT was developed.
- ROE will be established in the Commission order accepting the settlement in Docket No. ER07-562 and no change in ROE will be made absent a Section 205 or Section 206 filing at FERC. Education and outreach expenses relating to transmission, for example siting or billing
- K As provided for in Section 34.1 of the PJM OATT; the PJM established billing determinants will not be revised or updated in the annual rate reconciliations. L Amount of transmission plant excluded from rates per Attachment 5.

- M Payments made under Schedule 12 of the PJM OATT that are not directly assessed to load in the Zone under Schedule 12 are included in Transmission O&M on Line 47. If they are booked to Acct 565, they are included on Line 50. Copies of PJM invoices will be provided upon request. N The capital structure will remain 50% equity and 50% debt until construction of all of the segments of the TrAIL Project is completed and the entire TrAIL Project is placed in service. The first year that these projects are in service the formula will be run based on the 50/50 capital structure and on the actual year end capital structure. The two results will be weighted based on: the number of days the last project was in service and 365 day minus the numbers of days the last project was in service divided by 365 days. This can be illustrated using the following example:

#### Example:

Assume Last Project goes into service on day 260.

Hypothetical Capital Structure until the last project goes into service is 50/50. Assume Year End actual capital structure is 60% equity and 40% debt.

Therefore: Weighted Equity = [50%\*260+60%\*(365-260)]/365

#### Instructions for Account 190:

ADIT items related only to Retail Related Operations are directly assigned to Column C.
 ADIT items related only to Non-Electric Operations (e.g., Gas, Water, Sever) or Production are directly assigned to Column D.
 ADIT items related only to nansinsion are directly assigned to Column F.
 ADIT items related to Plant and non Columns C, D. E & F are directly assigned to Column F.
 ADIT items related to Plant and non Columns C, D. E & F are directly assigned to Column F.
 ADIT items related to abor and not in Columns C, D. E & F are directly assigned to Column G.
 Deferred iscome taxes arise when items are included in taxable income in different periods than they are included in rates. Therefore, if the item giving rise to the ADIT is not included in the formula, the associated ADIT amount shall be excluded.

Instructions for Account 283:

ADIT items related only to Retail Related Operations are directly assigned to Column C.
 ADIT items related only to Non-Electric Operations (e.g., Gas, Water, Severi or Production are directly assigned to Column D.
 ADIT items related on yie Transmission are directly assigned to Column F.
 ADIT items related to Parama on the Columns C, D & E are directly assigned to Column F.
 S. ADIT items related to bare and on to Columns C, D are are directly assigned to Column F.
 S. ADIT items related to bare and on to Columns C, D & E are directly assigned to Column F.

6. Deferred income taxes arise when items are included in taxable income in different periods than they are included in rates. Therefore, if the item giving rise to the ADIT is not included in the formula, the associated ADIT amount shall be excluded.

Criteria for Allocation:

- A Other taxes that are incurred through ownership of plant including transmission plant will be allocated based on the Gross Plant Allocator. If the taxes are 100% recovered at retail they shall not be included.
- B Other taxes that are incurred through ownership of only general or intangible plant will be allocated based on the Wages and Salary Allocator. If the taxes are 100% recovered at retail they shall not be included.
- C Other taxes that are assessed based on labor will be allocated based on the Wages and Salary Allocator.
- D Other taxes except as provided for in A, B and C above, that are incurred and (1) are not fully recovered at retail or (2) are directly or indirectly related to transmission service will be allocated based on the Gross Plant Allocator; provided, however, that overheads shall be treated as in footnote B above.
- E Excludes prior period adjustments in the first year of the formula's operation and reconciliation for the first year.

### Attachment 3 - Revenue Credit Workpaper

	Attachment 3 - Revenue Credit Workpaper		Amount	FERC Form No.1 page, line & Col
	Account 454 - Rent from Electric Property			
1 2	Rent from Electric Property - Transmission Related (Note 3) Total Rent Revenues	(Line 1)	-	Page 300 Line: 19 Column: b
	Account 456 - Other Electric Revenues (Note 1)			
3 4	Schedule 1A Net revenues associated with Network Integration Transmission Service (NITS) for which the load is not included in the divisor (difference between NITS credits from PJM and PJM NITS charges paid by Transmission Owner) (Note 4)		-	p328-330
8 9	Point to Point Service revenues for which the load is not included in the divisor received by Tran PJM Transitional Revenue Neutrality (Note 1) PJM Transitional Market Expansion (Note 1) Professional Services (Note 3) Revenues from Directly Assigned Transmission Facility Charges (Note 2) Rent or Attachment Fees associated with Transmission Facilities (Note 3)	smission Owner	3,367,845 -	Footnote Data Schedule Page: 328 Line: 1 Column: m
			-	
12	Gross Revenue Credits Less line 14g	(Sum Lines 2-10)	3,367,845	
13	Total Revenue Credits	(Line 11 - Line 12)	3,367,845	Input to Appendix A, Line 131
	Revenue Adjustment to determine Revenue Credit			
	Revenues associated with lines 14b-g are to be included in lines 2-10 and total of those revenues entered here Costs associated with revenues in line 14a		Ī	
14c	Net Revenues (14a - 14b) 50% Share of Net Revenues (14c / 2)		-	
14e 14f	Costs associated with revenues in line 14a that are included in FERC accounts recovered through the formula times the allocator used to functionalize the amounts in the FERC account to the transmission service at issue. Net Revenue Credit (14d + 14e) Line 14a less line 14f		-	
15	Amount offset in line 4 above		-	
16	Total Account 454 and 456		3,367,845	
17	Note 1: All revenues related to transmission that are received as a transmission owner (i.e., not received as a LSE), for which the cost of the service is recovered under this formula, except as specifically provided for elsewhere in this Attachment or elsewhere in the formula will be included as a revenue credit or included in the peak on line 178 of Appendix A.			
18	Note 2: If the costs associated with the Directly Assigned Transmission Facility Charges are included in the Rates, the associated revenues are included in the Rates. If the costs associated with the Directly Assigned Transmission Facility Charges are not included in the Rates, the associated revenues are not included in the Rates.			
19	Note 3: Ratemaking treatment for the following specified secondary uses of transmission assets: (1) right-of-way leases and leases for space on transmission facilities for telecommunications; (2) transmission tower licenses for wireless antennas; (3) right-of-way property leases for farming, grazing or nurseries; (4) licenses of intellectual property (including a portable oil degasification process and scheduling software); and (5) transmission maintenance and consulting services (including energized circuit maintenance, high-voltage substation maintenance, safety training, transformer oil testing, and circuit breaker testing) to other utilities and large customers (collectively, products). Company will retain 50% of net revenues consistent with Pacific Gas and Electric Company, 90 FERC ¶ 61,314. Note: in order to use lines 14a - 14g, the utility must track in separate subaccounts the revenues and costs associated with each secondary use (except for the cost of the associated income taxes).	I		
20	Note 4: If the facilities associated with the revenues are not included in the formula, the revenue is shown here, but not included in the total above and explained in the Cost Support. For example revenues associated with distribution facilities. In addition Revenues from Schedule 12 of the PJM OATT are not included in the total above to the extent they are credited under Schedule 12 of the PJM OATT.

#### Attachment 5a - Pre-Commercial Costs and CWIP

Step 1 Totals reported below are by project with the amounts to be expensed reported separately from those to be deferred and amortized (note, deferred costs related to 2006 include AFUDC).

For Forecasting purposes, Pre-Commercial expenses will be estimated. Total deferred and amortized Pre-commercial costs will be the actual amount agreeing to FERC Form 1 and Attachment 5.

For each project, where CWIP is to be recovered in rate base, CWIP will be estimated and the totals reported below by project. For the Reconciliation, for each project where CWIP is to be recovered in rate base the CWIP will be itemized by project below. Additionally, the amount of AFUDC that would have been capitalized for projects where CWIP is included in rate base will be reported in the FERC Form No. 1.

For the Reconciliation, the total additions to plant in service for that year will be summarized by project to demonstrate no Pre-Commercial costs expensed were included in the additions to plant in service and AFUDC on projects where CWIP was recovered in rate base was included in the additions to plant in service. The Pre-commercial expenses are actual expenses incurred for the reconciliation year. Total deferred and amortized Pre-commercial costs will be the actual amount Step 3 agreeing to FERC Form 1 and Attachment 5.

1 Small projects may be combined into larger projects where rate treatment is consistent. Pre-Commercial costs benefiting multiple projects will be allocated to projects based on the estimated plant in service of each project.

Allocation of Pre-Commercial Costs	Plant in Service	Allocation
	(Estimated 2/12/2008)	
Prexy - 502 Junction 138 kV (CWIP)	94,140,000	0.10734
Prexy - 502 Junction 500 Kv (CWIP)	121,260,000	0.13827
502 Junction - Territorial Line (CWIP)	661,600,000	0.75439
Total	877,000,000	1.00000

2 Column D is the total CWIP balance including any AFUDC, Column E is the AFUDC if any in Column D, and Column F is the AFUDC that would have been in Column E if CWIP were not recovered in rate base.

#### Attachment 6 - Estimate and Reconciliation Worksheet

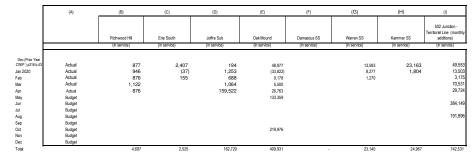

Exec S	ummary		
1	April	Year 2	TO populates the formula with Year 1 data
2	April	Year 2	TO estimates all transmission Cap Adds and CWIP for Year 2 based on each project's cost using the average of 13 monthly balances. Cap Adds are the projects expected to be in service in Year 2.
3	April	Year 2	TO adds Cap Adds and CWIP to plant in service in Formula (Appendix A, Lines 16 and 33)
4	May	Year 2	Post results of Step 3 on PJM web site
5	June	Year 2	Results of Step 3 go into effect
6	April	Year 3	TO estimates all transmission Cap Adds and CWIP during Year 3 based each project's cost using the average of 13 monthly balances. Cap Adds are expected be in service in Year 3.
7	April	Year 3	Reconciliation - TO calculates Reconciliation by populating the 13 monthly plant balances and beginning and end of year balances for the other rate base items and the 13 monthly averages for CWIP in Reconciliation (adjusted to include any
			Reconciliation amount from prior year).
8	April	Year 3	Reconciliation - TO adds the difference between the Reconciliation in Step 7 and the forecast in Step 5 with interest to the result of Step 7 (this difference is also added to Step 7 in the subsequent year)
9	May	Year 3	Post results of Step 8 on PJM web site
10	June	Year 3	Results of Step 8 go into effect

Step Month Year

#### Must run Appendix A to get this number (without any cap adds in Appendix A line 16 and without CWIP in Appendix A line 33)

2 April Year 2 TO estimates all transmission Cap Adds and CWIP for Year 2 based on each project's cost using the average of 13 monthly balances. Cap Adds are the projects expected to be in service in Year 2.

#### Attachment 9 - Financing Costs for Long Term Debt using the Internal Rate of Return Methodology

New Borrowing 0.005

TrALCo anticipates its financing will be a 7 year loan, where by TrALCo pays Origination Fees of \$5.2 million and a Commitments Fee of 0.3% on the undrawn principle. Consistent with GAAP. TrALCo will amoritize the Origination Fees and Commitments Fees using the standard Internal Pate of Ream formula below. Each year, TrALCo will bre up the amounts withdrawn, the interest paid in the year. Origination Fees, Commitments Fees, and total loan amount on this attachment.

Total Loan Amount	\$	900,000,000
nternal Rate of Return <sup>1</sup>		4.886348%
Based on following Financial Formula <sup>2</sup> :		
NPV = 0 = $\sum_{t=1}^{N} C_t / (1 + $	-IRR)pwr(	<i>(t</i> )
rrigination Fees		7,780,954
ddition Origination Fees		15,125
Total Issuance Expense		7,796,079

Revolving Credit Commitment Fee Revolving Credit Commitment Fee Old Borrowing 0.0050 0.0037 After borrowing is at the midpoint (\$275,000)

#### Attachment 9 - Financing Costs for Long Term Debt using the Internal Rate of Return Methodology

TrALCo anticipates its financing will be a 7 year loan, where by TrALCo pays Origination Fees of \$5.2 million and a Commitments Fee of 0.3% on the undrawn principle. Consistent with GAAP. TrALCo will amonize the Origination Fees and Commitments Fees using the standard Internal Fate of Feature Immution with the interest paid in the year. Origination Fees, Commitments Fees, and total loan amount on this attachment.

		\$	900,000,000
Internal Rate of Return <sup>1</sup>			4.886348%
Based on following Financial Formula <sup>2</sup> :			
$NPV = 0 = \sum_{t=1}^{N} C_t /$	(1+ <i>IRR</i> )p	wr	(†)

Origination Fees		
Origination Fees		7,780,954
Addition Origination Fees		15,125
Total Issuance Expense		7.796.079
	New Borrowing	Old Borrowing
Revolving Credit Commitment Fee	0.005	0.0050

Revolving Credit Commitment Fee

11/01/00000

#### 0.0050 0.0037 After borrowing is at the midpoint (\$275,000)

#### Attachment 9 - Financing Costs for Long Term Debt using the Internal Rate of Return Methodology

TrALCo anticipates its financing will be a 7 year loan, where by TrALCo pays Origination Fees of \$5.2 million and a Commitments Fee of 0.3% on the undrawn principle. Consistent with GAAP. TrALCo will amoritize the Origination Fees and Commitments Fees using the standard Internal Pate of Ream formula below. Each year, TrALCo will bre up the amounts withdrawn, the interest paid in the year. Origination Fees, Commitments Fees, and total loan amount on this attachment.

Total Loan Amount	\$	900,000,000
Internal Rate of Retu	urn <sup>1</sup>	4.886348%
Based on following	Financial Formula <sup>2</sup> :	
	N	
NPV = 0 =	$\sum_{t=1}^{n} C_t / (1 + IRR) pwt$	r(t)
NPV = 0 =		r(t)

Revolving Credit Commitment Fee	New Borrowing 0.005	Old Borrowing 0.0050	
Total Issuance Expense		7,796,079
